

DRINKING WATER SUPPLY WITHOUT COMPROMISE

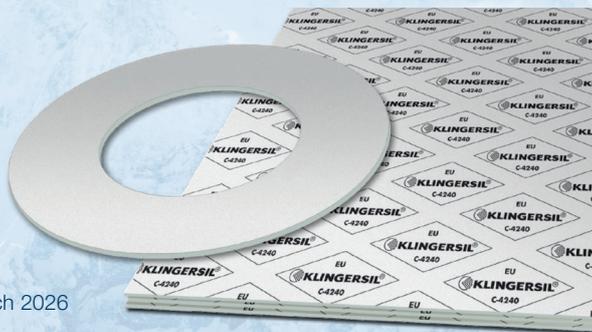

with the latest sealing technology by KLINGER

KLINGERSIL® C-4240

KLINGER Dichtungstechnik reacted immediately to the changes in the requirements for materials and substances in contact with drinking water in Germany and developed a new sealing material specifically for this purpose. The new KLINGERSIL® C-4240 gasket sheet completely meets all requirements of the elastomer guidelines of the German Federal Environment Agency. The suitability of KLINGERSIL® C-4240 for cold and hot water applications was tested in an independent test procedure and confirmed with a certificate.*

The advantages of KLINGERSIL® C-4240

- » Specially developed for the current requirements of the drinking water supply
- » All ingredients have been positively assessed and tested for their suitability for drinking water
- » No influence on the taste, smell, microbiological growth or the chemical composition of the drinking water
- » Consciously avoiding color pigments

* Validity:
until March 2026
